

TREFFOS SCHOOL

INDEPENDENT SCHOOL, NORTH WALES

'Not all classrooms have four walls'

"When the world is too much with us we are out of tune," Wordsworth.

Taking children outside the classroom into the world of nature helps them to keep in tune with themselves: open skies, mountains, sea shores, woodlands and rivers provide an inspirational learning environment that engages children actively in the learning process.

Pupils visited the site of the drowned village of Trywern near Bala (flooded in 1965). The rights and wrongs of this decision prompted lively classroom discussion.

Courtesy of a parent, they also toured a micro hydro plant, which generates electricity from mountain streams which feed into the electricity grid.

The dragon was raised from his slumber and provided an exciting start to a whole school celebration of Chinese Culture and the enjoyment of a wonderful feast provided very generously by our Chinese families.

Life Skills

"There are more stars in the universe than grains of sand on the earth", Einstein.

The Lower Juniors study of space was brought to an exciting finale with an after-school supper and stargazing evening shared with parents. Large telescopes provided opportunities for amazing views into the craters of the moon and the generation of a sense of awe and wonder.

A lovely project that stimulated so many questions, ideas and a search for fascinating facts. A seed may have been sown in a budding space traveller's mind - who knows!
